EDUCATION

Syracuse University, Whitman School of Management, Syracuse, NY

Bachelor of Science, Supply Chain Management & Finance, May 2004

GPA: 3.6 (5 Consecutive Dean's Lists)

Study Abroad, London, UK Focus: International Business / Finance

KEY AREAS OF EFFECTIVENESS

Management Science / Project Management / Procurement

- Utilized ERP and MRP systems to organize inventories and implemented JIT ordering to increase cost-effectiveness
- Optimized networks to determine minimum costs for shipping, maximum flow for crew scheduling, shortest transportation routes, and longest paths of projects
- Developed queuing models to determine wait times and genetic algorithms to predict population changes over time
- Determined MRP schedule for products by extracting information from SAP and optimizing constraints and profit in Excel
- Initiated ECR to increase customer service satisfaction by implementing a direct order processing system involving EDI
- Created and upgraded Microsoft Excel Database to formulate inventory totals aiding in decreased physical labor hours
- Strategically negotiated a purchasing agreement meeting all necessary conditions to receive decreasing percentages

Leadership / Training / Supervision

- Reorganized, designed, and implemented an employee training program to achieve TQM
- Project leader in developing an organization that was successful in providing application services for the medical industry
- Supervised over 50 employees and coordinated events for approximately 2500 guests leading to operational efficiency
- Coordinated and administered employee training and evaluations to assure optimal customer service levels
- Counseled underprivileged children with mental and developmental disabilities while providing respite for their parents

Research / Analysis / Forecasting

- Researched and developed an IT budget proposal that eliminated unnecessary spending and reallocated assets
- Analyzed pharmaceutical price comparisons to develop accurate forecasts for production quantities and sales volumes
- Assembled Microsoft Excel spreadsheets to aid in decision analysis of a business acquisition
- Computed optimal product pricing and implementation timeline using Microsoft Project and Solver to achieve maximum profit levels
- Developed financial analyses of competing UK firms to forecast performance and recommend portfolio construction

ACTIVITIES & HONORS
